## FOREST FIREFIGHTING

Providing a Resilient Forest Fire Mitigation Plan

WATER DIVERSION

FLUID TRANSFER

FORESTRY & FIRES

EMERGENCY RESPONSE

**Barricade Environmental** offers a complete range of Fluid Management Equipment and Manpower to customers requiring Emergency Response Services, while providing a response plan to mitigate Forest Fires. We have the experience as well as trained and certified crews, to provide on call 24/7 services for efficient deployment and installation of our services.

Our crews can arrange equipment and manpower to be mobilized to location within 24 hours of being requested. Depending on the requirements of the job; water can be either supplied to flood large areas, or supplied for firefighting and sprinklers.

**Barricade's** resilient forest fire mitigation plan covers the actions to be taken before a fire reaches an area, as well as how to recover after a fire has already started.

**Barricade** has previously worked with local governments and municipalities to mitigate and suppress fires. With our resilient Forest Fire Mitigation Plan, we were able to mobilize to location quickly, and transfer water to locations for fire fighters to access quickly and effectively. With safety being our top priority, we ensure our crews are safe with multiple daily meetings to discuss operations.
